CLEANING

The building's janitorial service company, Paramount Building Solutions, cleans your office. They will be in your space Monday through Friday, during evening hours. While most cleaning is handled after normal business hours, we do have day personnel available who can assist with spills, trash removal, etc. We are happy to take care of immediate cleaning requests but ask that the more time-consuming requests be arranged in advance.

If you have boxes or items to be disposed of that do not fit in a trash container, please label them with “trash” or “recycle” stickers that the janitorial company or building management has provided to you. Please note that the janitors will not remove any item outside of trash containers that do not have a “trash” or “recycle” sticker. If you are moving in, it is your mover’s responsibility to remove any boxes, crates, packing or other such materials from your office.

If you have any comments, concerns, or questions regarding the cleaning of your office please do not hesitate to call your Building Management.

ELEVATOR SERVICE

Elevator service is available beginning at 7 AM to 6 PM Monday to Friday. Before and after normal hours of building operation (including weekends and holidays), elevator service is available by access card only. Card readers are available on the first and second floor at the touchscreens to the left outside the elevator lobby. The security staff and cleaning staff will not provide elevator access to individuals who do not have an access card.

If an elevator fails to operate properly, please let Building Management know immediately. If you are detained inside the elevator cab due to a malfunction, REMAIN CALM. Use the call button inside the elevator, which connects directly to the elevator maintenance company, to signal your stalled status. Building staff will make every effort to release you from the elevators as quickly as possible. However, due to safety regulations, they are limited in the assistance they can provide. Our elevator maintenance company will be immediately dispatched to correct the problem.

HEATING & AIR CONDITIONING SERVICES

Standard operating hours for the building’s heating and cooling system are from 7:00am to 6:00pm. We would be glad to arrange for HVAC service beyond these hours at an additional charge. Requests for additional service should be placed at least 24 hours in advance by calling Building Management.

INCIDENT REPORTS

To record the details of any accident, theft, or injury that occurs on the property, incident reports must be filed. Please notify Building Management, or Building Security if not available, as soon as an incident occurs so we can follow up with the appropriate record taking. We appreciate your cooperation in answering any questions the building staff may have pertaining to the incident.

We encourage you to review these security reminders to help you avoid unnecessary loss and problems within your suite.

- When you secure your premises at the end of the business day, lock all doors, and then verify they properly locked.
- Notify the building management or security staff immediately if you notice a suspicious person loitering in or about your premises. Be suspicious of any person who enters your suite and when confronted makes excuses that they are lost or looking for another company.
- Put serial numbers on all business equipment to aid police in locating the equipment if it is stolen.
- If an employee is terminated for any reason, consider changing cylinders on the lock, resetting any safe or vault combinations they may have been entrusted with, and canceling security access cards with building management.
- Keys kept on a key ring or access cards should never have an identifying tag. If they are lost, they may easily be used to access your premises.
- If sidewalk or corridor deliveries of goods are made, do not leave items unattended.
- Never leave your reception area unattended when your suite entry door is unlocked.
- Consider having routine background checks done on prospective employees as an additional security precaution.

SUMMER WEATHER:

Tips for Preventing Heat Related Illness

1. Drink more fluids (nonalcoholic), regardless of your activity level. Don't wait until you're thirsty to drink. Warning: If your doctor generally limits the amount of fluid you drink or has you on water pills, ask how much you should drink while the weather is hot.
2. Don't drink liquids that contain alcohol or large amounts of sugar—these cause you to lose more body fluid. Also, avoid very cold drinks because they can cause stomach cramps.
3. Stay indoors and, if possible, stay in an air-conditioned place. If your home does not have air conditioning, go to the shopping mall or public library—even a few hours spent in air conditioning can help your body stay cooler when you go back into the heat. Call your local health department or Red Cross chapter to see if there are any heat-relief shelters in your area.
4. Electric fans may provide comfort, but when the temperature is in the high 90s, fans will not prevent heat-related illness. Taking a cool shower or bath or moving to an air-conditioned place is a much better way to cool off.
5. Wear lightweight, light-colored, loose-fitting clothing.
6. NEVER leave anyone in a closed, parked vehicle.
7. Although anyone can suffer from heat-related illness, some people are at greater risk than others. Check regularly on:
 - Infants and young children
 - People aged 65 or older
 - People who have a mental illness
 - Those who are physically ill, especially with heart disease or high blood pressure
8. Visit at-risk adults at least twice a day and watch them for signs of heat exhaustion or heat stroke. Infants and young children, of course, need much more frequent attention.
9. If you must be out in the heat:
 - Limit your outdoor activity to morning and evening hours
 - Cut down on exercise. If you must exercise, drink two-to-four glasses of cool, nonalcoholic fluids each hour. A sports beverage can replace the salt and minerals you lose in sweat.

Warning: If you are on a low-salt diet, talk with your doctor before drinking a sports beverage. Remember the warning in the first “tip” (above).

- Try to rest often, in shady areas
- Protect yourself from the sun by wearing a wide-brimmed hat (also keeps you cooler) and sunglasses and by putting on sunscreen of SPF 15 or higher (the most effective products say “broad spectrum” or “UVA/UVB protection” on their labels).

In the event of an elevator malfunction:

1. Remain calm – the elevator will remain in place with continued air supply.

3. Answer the telephone in the elevator if it rings.
4. **DO NOT** try to open an elevator door or climb out of the elevator.
5. Should a medical emergency take place while in a malfunctioning elevator, have the elevator repair service call 911 to explain the medical condition, as you cannot dial out on the elevator phone.
6. Someone will be in touch with you by phone or from outside the elevator.
7. Passengers will be assisted as soon as possible.

IN THE EVENT OF A SHOOTER IN THE BUILDING:

Evacuate

If there is an accessible escape path, attempt to evacuate the premises. Be sure to:

1. Warn individuals not to enter an area where the active shooter may be.
2. Have an escape route and plan in mind.
3. Evacuate regardless of whether others agree to follow.
4. Leave your belongings behind.
5. Help others escape, if possible.
6. Keep your hands visible.
7. Follow the instructions of any police officers.
8. Do not attempt to move wounded people.
9. Call 911 when it is safe to do so.

Hide Out

If safe evacuation is not possible, find a place to hide where the active shooter is less likely to find you.

Your hiding place should:

1. Be out of the active shooter’s view.
2. Provide protection if shots are fired in your direction (i.e., an office with a closed and locked door).
3. Not trap you or restrict your options for movement.

4. To prevent an active shooter from entering your hiding place:
 - a. Lock the door.
 - b. Blockade the door with heavy furniture.
 - c. Close, cover, and move away from windows.

Keeping Yourself Safe While Hiding

If the active shooter is nearby:

1. Lock the door.
2. Silence your cell phone and/or pager. (Even the vibration setting can give away a hiding position.)
3. Hide behind large items (i.e., cabinets, desks).
4. Remain quiet.
5. Consider the difference between cover and concealment. Cover will protect from gunfire and concealment will merely hide you from the view of the shooter. Choose the best space that is available quickly.

When it is safe to do so call 911

When possible, provide the following information to law enforcement officers or 911 operators:

1. Location of the active shooter.
2. Number of shooters, if more than one.
3. Physical description of the shooter(s).
4. Number and type of weapons held by the shooter(s).
5. Number of potential victims at the location.

3. Should it be necessary to evacuate the premises, you will be directed to do so by St. Louis Park and/or Golden Valley Police Department or their Fire Department.
